

Farmer Trainings in Ordu Province Çatalpınar District's Local NGO (Action Association)

With the cooperation of Çatalpınar Local Development Association and Balsu, a training was held in the Çatalpınar district of Ordu to increase the yield and quality of hazelnuts and to grow sustainable hazelnuts.

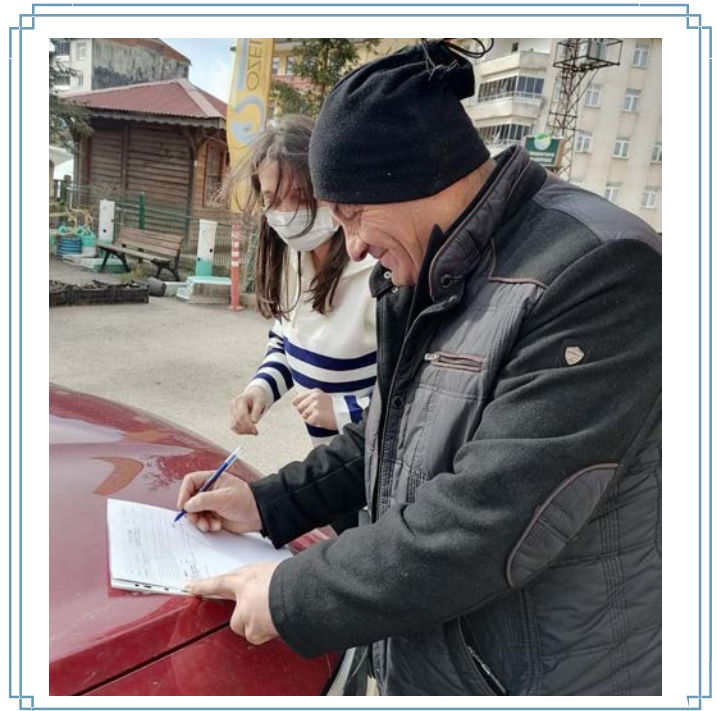

Social and Environmental aspects of Hazelnut Cultivation, Certification Processes, Good Social Practices in Sustainable Agriculture and Occupational Health and Safety topics was in the heart of the session that reached nearly a hundred hazelnut farmers.

The First Model Garden in the Eastern Black Sea Region

As Balsu, we took the first steps for the model garden activity in the Gürgentepe district of Ordu province in cooperation with the Governmental District of Agriculture Directorate. A mutual goodwill agreement was signed with the owner of the model garden, and the work in the garden was started by taking soil samples from the garden.

The existing topographic structure of the garden is evaluated and the applications are planned by taking notes about the garden facility.

Gübreleme Şekli ve Zamanı: Kasım - Şubat Arasında Fosforlu ve potasyumlu gübrelere bakiye tuz eklenmesi ile en 10-15 cm derinliğe açılan 16-32 adet ara aralık çukurları eşit olarak dağılıp üzeri toprakla kaplanır. Kasım - Mart Arasında Hazır gübre ve tuz dağılımlarında 10 - 40 cm derinliğinde okortir dairesel banda serilir, toprakla kaplanır. Mart Arasında T. m. traktörle K. çukurları hazırlanır. Açıkta gübrelenen her iki sınıf kültürde. Tuz dağılımlarında 10-40 cm derinliğinde okortir dairesel banda sızdırmaz yapılar. Kasım - Mart Arasında (Baş) Hazır gübre ve Hazır Amli Gübre: Akortir gübresi her iki sınıf kültürde. Mart ayında verilen azot gübresi ile ayrı şekilde verilir. Bu gübreleme verilen gübre ile sonraki sezonun verimini etkilemektedir.			

Visits to Immigrant Provinces of Turkey for the Harvest of Hazelnuts and Other Agricultural Products

As Balsu, we visit Labour intermediaries in their home towns as part of the social activities we carry out in the post-harvest winter period. We made our first visit to the provinces of Diyarbakır and Mardin before the 2022 harvest.

We reached out to children and their families who participated in the workshops within the scope of the children protection program during 2021 hazelnut harvest, in cooperation with the Young Lives Foundation.

In a village school in the Kızıltepe district of Mardin province, we had fun with the children and provided children's rights education.

We will continue our activities to fight against child labour within seasonal agricultural workers in Turkey and reach labour intermediaries, workers, women workers and children in the "Origin" (migrating) cities of seasonal agricultural worker families, in cooperation with non-governmental organizations, ministries, local administrations and universities.
